

Jhojhu Golden Transport

Project Transportation. Planned. Coordinated. Delivered.

Company Snapshot

2018

Established

Delhi

Head Office

200+

Transport Partners

35+

Branches across India

Industries Served

- Power Transmission
- Renewable Energy
- Heavy Engineering
- Infrastructure
- Industrial Manufacturing

Vehicle Categories

- Open Body Trucks, Closed Body Trucks
- Closed Body Trucks
- Flatbed Trailers, 40-ft trailers
- Multi Axle Trucks
- Semi Low Bed, Low Bed
- Hydraulic Axles

A NOTE FROM THE FOUNDER

I started Jhojhu Golden Transport in 2018 after spending years working closely with transporters across northern and central India. The idea was straightforward — project companies need vehicles at the right time, at the right place, and they need someone who picks up the phone and gets it done.

We operate our own fleet and also coordinate transportation through a vetted network of 200+ transport partners. We have build strong relationships with our transport operators who trust us, and who we trust in return. When a client calls at short notice needing 30 trailers in Odisha or a low-bed in Mizoram, we know exactly who to reach.

Our work is simple but it requires reliability. Projects cannot wait. Deadlines do not move. And transportation is often the part that gets complicated last. That is where we step in — not with promises, but with vehicles on ground.

Amresh Kumar Sharma

Proprietor, Jhojhu Golden Transport

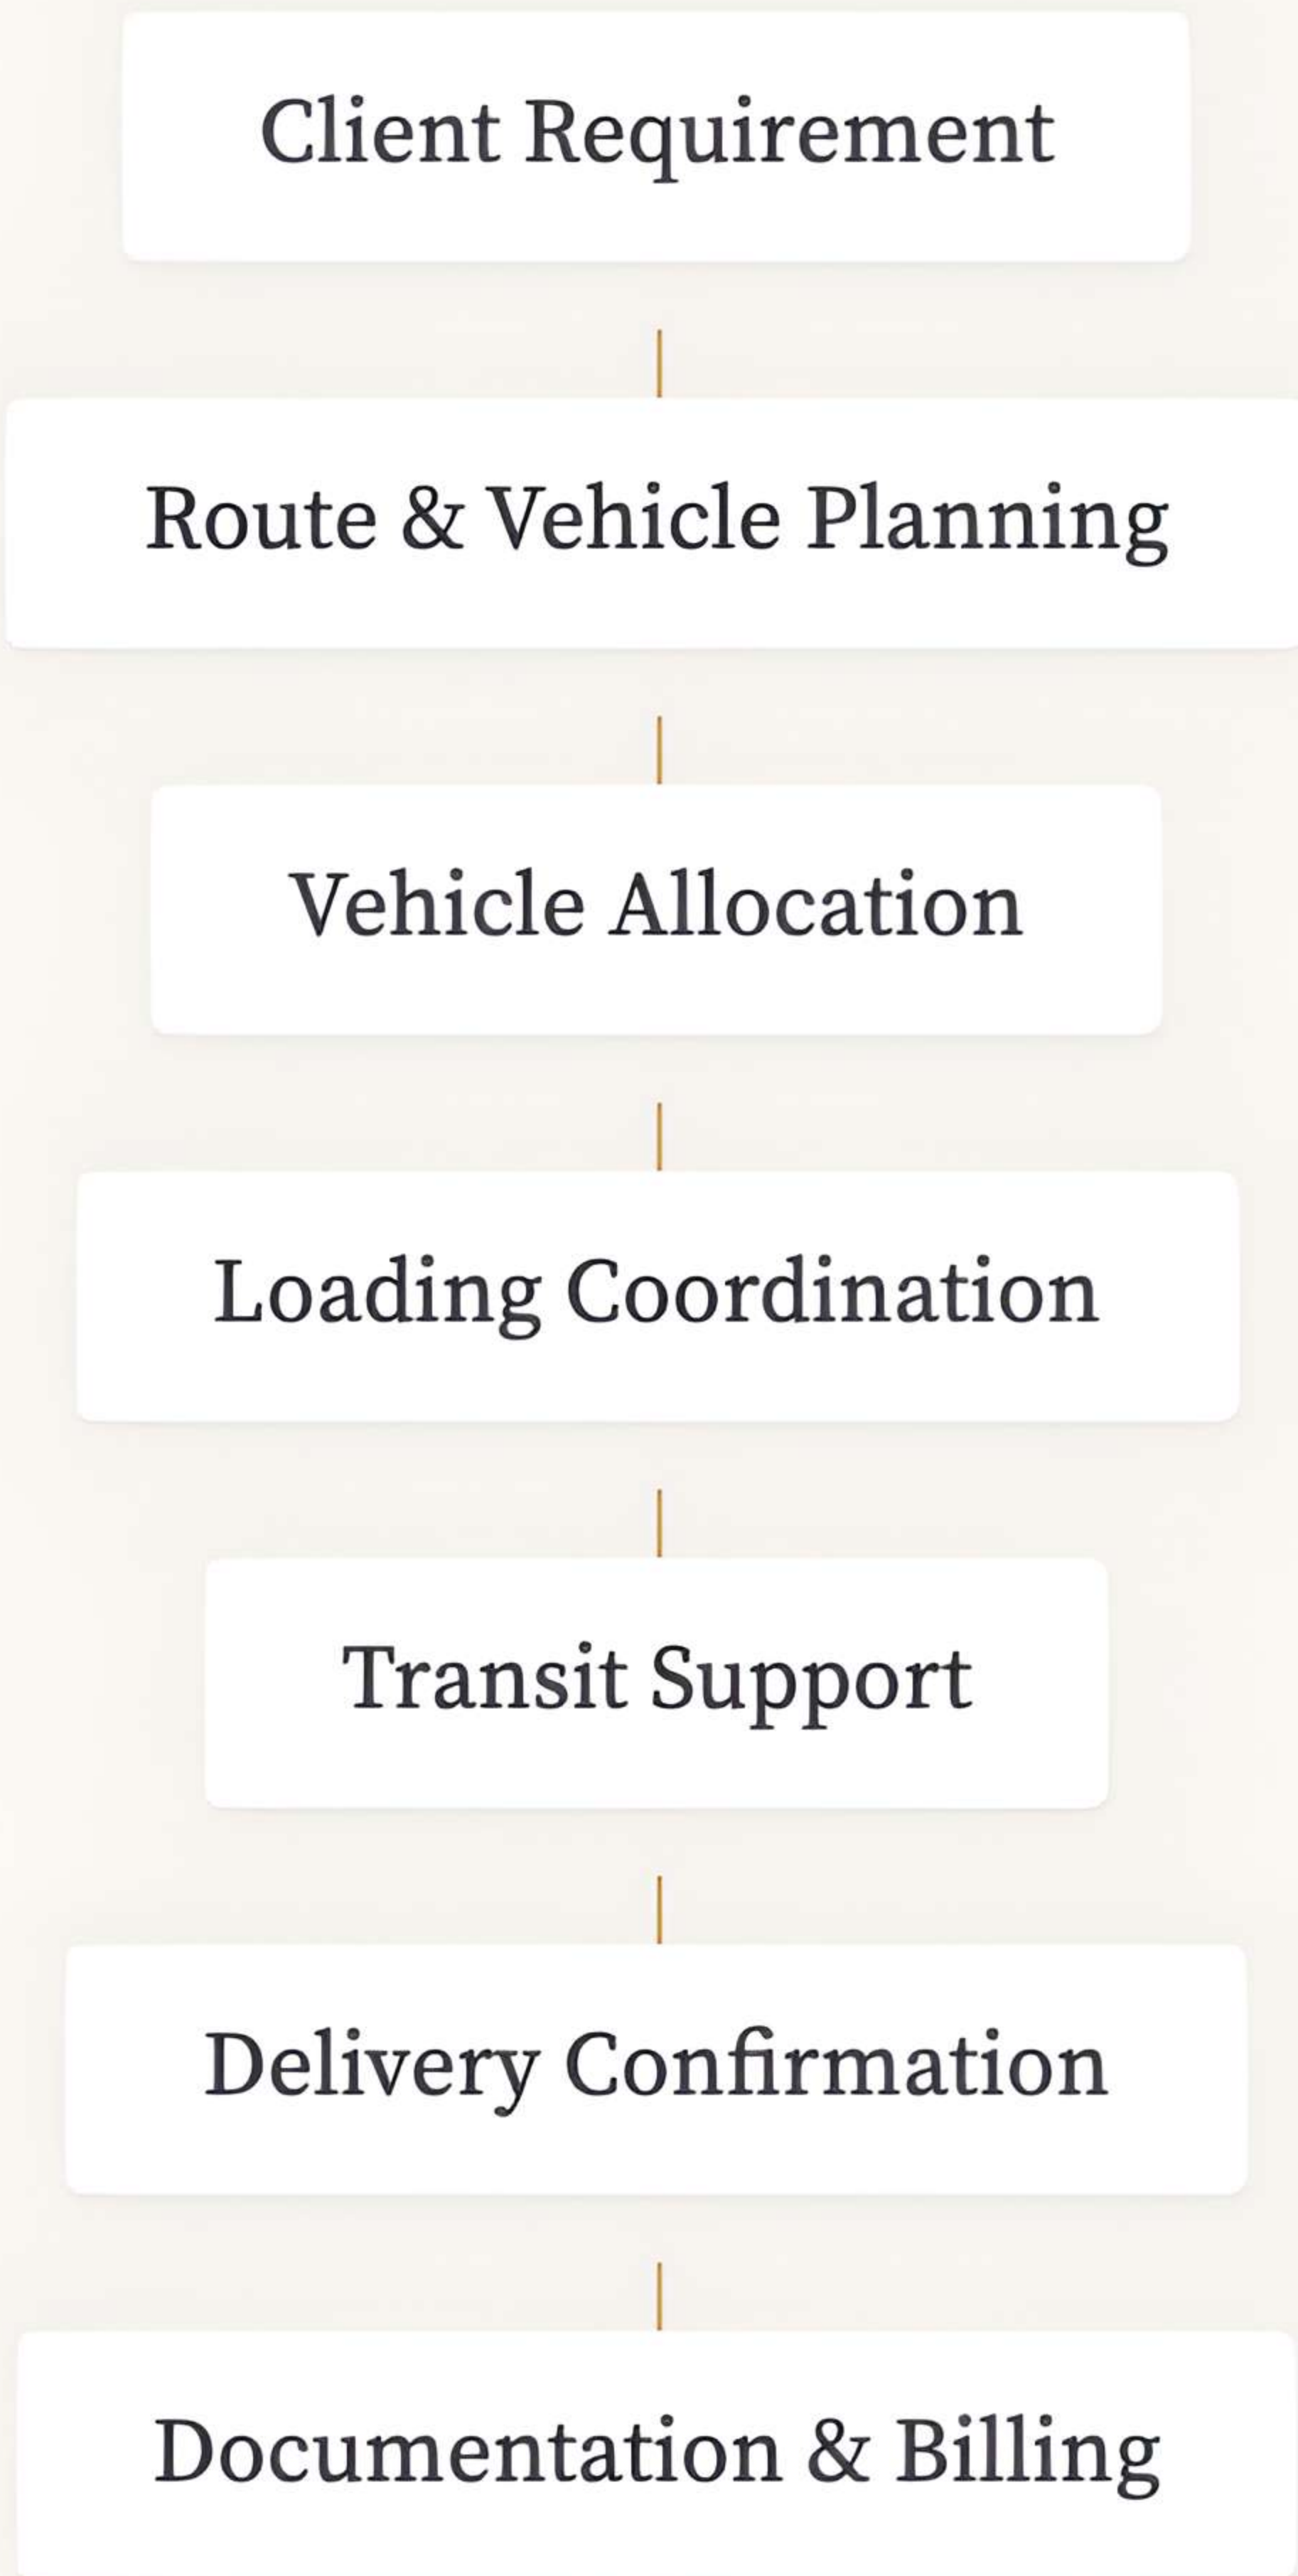

Who We Are

Jhojhu Golden Transport is a Delhi-based project transportation company that arranges and coordinates vehicle movement for infrastructure, power, and industrial projects across India, Nepal, and Bhutan.

We operate on an asset-light model — rather than owning vehicles, we work through a network of 200+ trusted transport partners built over years of direct working relationships. This gives us the flexibility to mobilize the right vehicle type, in the right quantity, at the right location — without the constraints of a fixed fleet.

How We Work

Transportation Capabilities

General Freight

Open body, closed body, and containerised transport for standard industrial cargo. Suitable for manufactured goods, packaged materials, and general equipment movement across states.

Project Transportation

Flatbeds and 40-ft trailers for transmission towers, wind energy components, steel structures, and project materials. Coordinated multi-vehicle dispatches for site requirements.

Heavy Haul

Semi low bed, low bed, hydraulic axle, and multi-axle trailers for over-dimensional cargo. Transformers, turbines, boilers, and heavy machinery requiring specialized handling.

Operational Support

Emergency mobilization at short notice. Multi-state coordination for distributed project sites. Single-window communication for all transportation requirements on a project.

Industries We Serve

Power Transmission

Tower parts, conductors, insulators, hardware fittings, and stringing equipment.

Renewable Energy

Wind turbine blades, nacelles, tower sections, solar structures, and inverters.

Heavy Engineering

Boilers, pressure vessels, heat exchangers, and fabricated steel structures.

Infrastructure

Precast segments, structural steel, construction machinery, and bridge components.

Industrial Manufacturing

Factory equipment, CNC machines, dies, moulds, and finished industrial goods.

Representative Experience

Transportation support provided in connection with projects involving the following organizations.

POWER TRANSMISSION

Sterlite Power • Power Grid Corporation

Transportation of tower parts, conductors, and hardware to project sites across multiple states including remote northeastern locations.

RENEWABLE ENERGY

Suzlon Energy

Movement of wind energy components including blades and tower sections requiring specialized trailers and route planning.

HEAVY ENGINEERING & EPC

ISGEC • Andritz Hydro • L&T • Simplex

Heavy and over-dimensional cargo including boilers, hydro equipment, and fabricated structures for industrial and hydro projects.

STEEL & MANUFACTURING

Jindal • Bhushan • Masyc Projects

Regular and project-based movement of steel products, structural materials, and industrial equipment.

Project Case Studies

Transmission Project — Aizawl, Mizoram

CHALLENGE

Remote terrain in Mizoram with narrow, winding hill roads and limited vehicle access. Standard trailers could not navigate the final stretch to the project site.

OUR ROLE

Coordinated a combination of long-haul trailers and smaller vehicles for the last mile. Identified local transporters familiar with the terrain and managed the relay.

OUTCOME

All materials delivered to site without damage or project delay. Repeat requirements handled through the same coordination structure.

Large-Scale Mobilization — Amarchinta, Telangana

CHALLENGE

Rapid arrangement of a large number of trailers within a compressed timeline for a project site that required simultaneous loading from multiple origins.

OUR ROLE

Activated transport partners across multiple states simultaneously. Managed scheduling, dispatch sequencing, and on-ground coordination to avoid site congestion.

OUTCOME

All trailers mobilized and materials delivered within the required timeline. The project team confirmed no delays attributable to transportation.

Why Clients Work With Us

- ✔ Trusted relationships with 200+ transport operators built over years of consistent work — not a marketplace, but a network.
- ✔ Quick response on vehicle availability. We typically confirm within hours, not days.
- ✔ Experience moving cargo to remote and difficult-access locations across India's northeast and hilly regions.
- ✔ Consistent execution across repeat requirements — the same quality of coordination every time.
- ✔ Single point of coordination. One call, one person responsible for your transportation requirement.
- ✔ Proven ability to mobilize large numbers of vehicles at short notice for project deadlines.
- ✔ Transparent communication. We share problems early rather than hiding them.
- ✔ Project-focused approach. We understand that transportation is a support function to your larger project timeline.

A yellow JCB SiteMaster telehandler is being transported on a flatbed trailer. The telehandler has "SITEMASTER" and "JCB" written on its side. It is positioned on a construction site with various materials and equipment in the background. The scene is dimly lit, suggesting dusk or dawn.

Projects move forward when transportation moves on time.

We look forward to becoming a dependable transportation partner for your future projects.
